**The Core Exhibition shows 1000 years of the history of Polish Jews – from the Middle Ages until today. We learnt how Jews came to Poland, how Poland became the center of the Jewish Diaspora and the home of the largest Jewish community in the world for some time, and how is Jewish life being revived. The exhibition is quite big and has eight galleries. The galleries present different times of history, legends of Jews, the beginnings of Jewish settlement in Poland and the development of Jewish culture. The museum shows the social, religious and political life of Polish Jews. It also shows dramatic events from the past including the Holocaust. Yes, we will recommend POLIN to our families and our friends to come here because the museum is very interesting and realistic.**

The POLIN museum is very big and so beautiful. It's amazing because it's a historical object. The Jewish street is full of old newspapers. Due to the enormous wealth of Jewish life it witnessed, this period is also sometimes referred to as the second "Golden Age" in the history of Polish Jews.
